

w2hts Waste Water Heat Transfer Systems, LLC.

In line with our goal of creating products that maximize energy efficiency and that reduce consumer costs, W2HTS developed a product called HeatWave. It is a patent-pending, renewable energy product that transfers heat from a facility's waste stream to potable water; virtually eliminating wasted energy, while saving lump sums of money fast!

Are you curious to see exactly how much money you'll save by installing HeatWave in your facility?

Complete our easy-to-use savings calculator using your facility's energy consumption information to determine just how much you can expect to save.

Hourly Volume of Hot Liquid Created		Gallons Per Hour
Operating Hours		Hours Per Day
Operating Days Per Year		Days Per Year
Total Gallons of Hot Liquid Per Year		Gallons Per Year
Temperature of Hot Liquid		Fahrenheit

Electric Customers		
Electric Rate		\$ / KWH
Annual Energy Cost		

Natural Gas Customers		
Natural Gas Rate (Cost per Mcf)		\$ / Mcf
Annual Energy Cost		
Heat Exchange Efficiency 50% - 70%		%

Annual Savings	
Electric Customers	
Natural Gas Customers	

Different businesses have different needs. After viewing potential HeatWave savings, the next step is to contact one of our sales engineers for a customized ROI report.
